

BMP Summary Sheet

MS4 Name: University of Minnesota, Twin Cities

Minimum Control Measure: 6-POLLUTION PREVENTION/GOOD HOUSEKEEPING

Unique BMP Identification Number: 6A.16 (MS4 2020: 21.3.b, 21.4.f)

BMP Title: Equipment Storage and Maintenance

BMP Description:

The UMN-TC defines equipment storage and maintenance facilities as locations where equipment that is used for exterior campus maintenance activities (municipal operations) are stored and/or maintained outside. The equipment does not include fleets, service vehicles, or those related to non-municipal operations.

Equipment storage and maintenance facilities are mapped in the Facilities Map and indicates the managing department of each facility.

Equipment is washed indoors whenever possible. If equipment is washed outside, it is done away from storm drains or storm conveyance systems.

Equipment is maintained indoors. Equipment fluids are properly disposed.

Measurable Goals:

Number of equipment storage and maintenance facilities

Vehicle and Equipment Washing Best Practices document sent to facility managers, annually

Timeline/Implementation Schedule:

Email facility managers to provide Vehicle and Equipment Washing Best Practices document to staff, once a year

Specific Components and Notes:

Vehicle and Equipment Washing Best Practices document

HSRM Spill Response Program/SPCC plan

BMP 6A.14 Fueling System Spill Protection

Responsible Party for this BMP:

Name: Catherine Abene, P.E.

Department: Principal Civil Engineer, Energy Management
